Experience

Software Engineer I & II – Amazon Web Services

8/21 - Present, New York, NY (**TypeScript, Rust, Python, Kiro AI, Claude, AWS**)

- Promoted to SDE2 in 2022 on the [Cloud Development Kit](#) team – AWS's infrastructure-as-code platform with 4M+ weekly downloads.
- Designed and built a telemetry service for CDK CLI serving 100k+ invocations/hour; provides real-time usage metrics and alerts the team to regressions within 15 minutes. This is now a foundational shared service consumed across the Dev Tools org.
- Architected CDK's validation framework integrating default, 3rd-party, and bespoke annotations into a single layer with suppression and auditing support for enterprises. 10+ external plugins built on the framework including [cdk-nag](#) (250k weekly downloads).
- Re-architected the failing npm ingestion workflow in [Construct Hub](#) (website that catalogs 3k+ CDK constructs) to a robust architecture with AWS Lambda / StepFunctions that protects against eventual-consistency bugs that caused frequent missed package updates.
- Developed [reveries](#), a continuous-learning AI subsystem for Kiro AI that observes developer sessions, detects personal patterns, and builds a per-user library of "instincts" that make Kiro AI better over time.
- Own [cdk-pipelines-github](#) end-to-end – a CI/CD platform for deploying CDK apps via GitHub Workflows. 27 unique open-source contributors, 381+ GitHub Stars, 20k+ weekly npm [downloads](#).
- Designed a bespoke incentive system called [CDK Merit Badgers](#) that assigns a badge to every open-source contribution received, as well as the underlying workflows that help guide 'beginning-contributors' to mentorship from tenured contributors.

Software Engineer Intern – Amazon Web Services

6/20 - 8/20, Seattle, WA (**TypeScript, Git, AWS Certified Cloud Practitioner**)

- Fully owned all phases of the software development lifecycle for a new CDK Construct modeling AWS CloudWatch Synthetics, launching it in Developer Preview a month ahead of schedule.

Senior Computer Science Instructor – Juni Learning

1/19 - 8/21, Remote (**Java, C++, Python**)

- Cultivated student understanding in data structures, AP Computer Science, and USA Computing Olympiad (Bronze & Silver).
- Developed [curriculum](#) for a new Python Algorithms course, conducted diagnostic trial lessons, screened instructor applicants.

Languages & Tools

- **Languages:** Proficient: **TypeScript, Python, Rust**. Experienced: **Java, JavaScript, C/C++, Swift**.
- **Cloud:** AWS Lambda, SQS, SNS, DynamoDB, StepFunctions, Kinesis, Glue, CodePipeline, CDK.
- **Tools:** CDK/Terraform, [Node.js](#), GraphQL, REST, Git, GitHub Workflows, Docker, Claude.

Education

Williams College – B.A., Computer Science

9/17 - 5/21, Williamstown, MA (GPA: 3.65, Computer Science GPA: 3.77, *Dean's List*)

- **CS:** Programming Languages (**Lisp, Scala, C++, Java, Rust**), Software Methods (**Swift**), Applied Algorithms (**C**), Theory of Computation, Algo. Game Theory, Algorithm Design / Analysis, Data Structures (**Java**).
- **Math:** Graph Theory, Linear Algebra, Discrete Math, Multivariable Calculus, Game Theory, Econometrics (**Stata, R**).

Columbia University – Visiting Student in Computer Science

9/19 - 12/19, New York, NY (GPA: 3.64)

- Microservices (**Python**), Advanced Programming (**C, C++**), Artificial Intelligence (**Python**), Databases (**Python, SQL**).

Projects

CryptoNight Code Words Game – Personal

1/21 - 2/21 (**JavaScript, Bootstrap, Node.js, Express.js, Socket.io, MongoDB, AWS, nginx**)

- Real-time multiplayer web [game](#): users create/join rooms, live chat with command-based stats, team selection, live leaderboard, and Codenames game functionality.
- Deployed on AWS EC2 with Elastic IP + AWS Route 53; configured nginx for http/https routing.

Ticket to Ride Board Builder – Personal

3/20 - 5/20 (**Swift, XCode**)

- iOS [app](#) with MVC architecture that lets users design custom railroad networks of cities and tracks.
- Implemented graph structure and Dijkstra's shortest-path from scratch.

Leadership & Interests

- Leadership: Captain of Williams Ultimate Frisbee, '21 Donovan Award [finalist](#) (top DIII player in the country).
- Interests: Planes, Award Travel, Ultimate Frisbee/Disc Golf, Sabermetrics, Ticket to Ride (board game), Poker, Chess.
